Outstanding Loudspeakers for Demanding Installations.

In order to create the Explorer Collection, we started with our award-winning Director Loudspeakers and dissected them. We’ve added seals, gaskets, stainless steel components, and then had the whole thing IP66 rated. To top that off, we’ve changed the materials, and the Explorer Series can withstand temperatures as high as 117°C (242°F) all the way down to -20°C (-4°F). We had to be thorough, because even one drop of water escaping into your ceiling or walls is unacceptable. Then, to continue our commitment to you, we’ve backed these speakers with our lifetime guarantee. So even in the most extreme environments, you can rest assured, Origin Acoustics Explorer Loudspeakers will perform for years to come.
